*"One of the most significant barriers we face to high performance is a critical mass of skilled managers. We have struggled as an organization to find top quality management training for our emerging leaders, and were lucky enough to send our managers to Managing for Success. The training opened the eyes of our managers to important skills that have empowered them to serve students and staff better."*

The Managing for Success program prepares managers with knowledge, tools, and peer support to increase their effectiveness in driving social impact.

## By the end of Managing for Success, participants will:

- Understand their personality styles and preferences, and those with whom they work;
- Build competencies to effectively communicate and delegate to direct reports and colleagues;
